FS is mostly fine.

We're trying to finish up the ARARs table and I still have some issues with the COC table, for example, why is barium still non-site related?

I'm thinking of just approving the FS with the language used in the other approval letters, and then changing the COC and ARAR tables for the ROD.

Let's see how that goes. Time's short, so it will probably fly.

(I love August!)

John, Carrie, here's the Risk Assessment approval letters. Next up FS.

Jon
