Hey Carrie, yes they'll begin removing it next week.

One thing I noticed, it seems NuStar is locking the gate near the South Branch Creek so they can drive over the site. Do you know how long that's been going on? I guess I don't have a problem with it if they leave us a key.

Jon,
I visited the site today to look at the interim pipeline area and have spoken to John Hoffman. The hay bales are not a concern and this area of the site appears to have been left in good shape. The only issue is that there are several piles of covered dirt remaining on-site which we assume Praxair will be removing in the near future.
Thanks,
Carrie

John, Carrie Praxair is done with the interim pipeline. I checked it out today, and it looks fine as far as access/egress for is concerned. I thought you might want to take a look before I sign off on anything.

Oh, I asked them to leave the hay bales that they placed near the SBC. If you want them removed, I'll let them know.
