Subject:	Priority 15-Day Report 51-MON-17 (57 Strawberry Harvesters-3 Field Worker Crews; Possible Insecticide/Fungicide Exposure; 8+ w/Symptoms; 3 Taken for Medical Attention)
Date:	Friday, July 21, 2017 1:12:45 PM
Attachments:	51-MON-17 Priority 15-Day Report.pdf

**UPDATE: As of July 19, 2017, 17 of the 22 members of the first crew have been interviewed, as well as 3 of the 18 members of the second crew. Additional symptoms reported have been eye irritation, skin irritation and itching, dry throat and lips, chest pain, back pain, coughing, cloudy vision and fatigue. The two pesticide applicators have been interviewed, stating that they were aware of the field worker crew below, but were directed to continue the application, which they started at approximately 5:30am; no quantitative wind measurement was taken before or during the application by either handler. Interviews are ongoing, weather data has been collected, and 15 clothing samples have been prepared for laboratory analysis.
