Subject:	Priority 53-SCR-17 PENR (6 field workers harvesting raspberry sought medical attention after smelling a pesticide odor and experiencing symptoms)
Date:	Friday, July 07, 2017 3:54:10 PM
Attachments:	53-SCR-17 PENR.pdf

On July 5, 2017 a crew of 36 field workers were picking raspberries in hoop houses when some of them noticed a pesticide odor. Three field workers developed symptoms that day and were directed to seek medical attention. The following day, while working in the same raspberry hoop houses, 3 additional field workers developed symptoms and they too sought medical attention.
The Santa Cruz County Agricultural Commissioner's staff is investigating this incident.
