Please see attached the Pesticide Episode Notification Record for priority investigation 38-SON-16
Summary:
On 4/7/16, an application of Suppress and Turf Trax Blue HC was made by employees of the school district to Mc Near Elementary School during school hours. The application was made with backpack sprayers to fence lines, around buildings, parking lots, around school fields and in landscaped areas. Teachers and students at the school complained of a strong odor and noticed the blue color of the Turf Trax Blue in the areas that were sprayed. A few students went home early that day and complained of not feeling well. The day of the application, and a few days later, approximately 7 individuals experienced symptoms potentially related to the application. OSHA was initially contacted by one of the teachers to investigate the incident. Sonoma County CAC is currently investigating the incident further.
