These permits are each AUTHORIZATION TO DISCHARGE UNDER THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM . According to information from Public Employees for Environmental Responsibility (PEER) the permits are incomplete and do not adequately protect surface waters and the wildlife which depend on ponds, streams etc for their survival. Once the watershed is contaminated with produced water and/or fracking fluids, it is impossible to clean up. The best policy is not to contaminate in the first place.

Please rewrite these permits according to PEER comments. Native people, and indeed all of us, depend on clean water and uncontaminated watersheds and land for our survival.

Thank you for the opportunity to comment on this issue.

Kindest regards,

Katherine Kasza
