Chauncey called me to talk about the Lahaina presentations and DOH response. He says it's like "rolling a brick" to get the other programs attention to the issues and that nothing has moved as a result of the talks. He recommends EPA follow up with the individual programs before our cross program meeting in December. I think that's a good idea. He suggests a call with Alec about NPDES, 401 , 308 and a call with wastewater (Tom and Sina). (Yes, Sina did attend the presentations). We may need meetings with the first level supervisors, Joanna and Mike in CWB too.

Chauncey reiterated that he can put new limits in the state U"IC permit, but another branch woujld have to develop those limits or conditions for includsion. SDW Branch can't do that.
