NR:

So far the contents of the Federal UIC permit look okay.

Your parameter list is longer because you are asking for additional testing. To make this clear, you could say, "In addition to Hawaii UIC's permit monitoring list, the following parameters shall be monitored with …"

In the general language of our current UIC permits, we have revised or added new material. I will email to you a blank UIC permit. See if you want to use any of the material. In particular, use the current "Proper Operation and Maintenance" wording on page 12, and add in "Investigative and/or Mitigative-action Work" wording on page 16.

Norris Uehara is also reviewing your draft. We are trying to get this done between calls and everything else. We will let you know as soon as possible if we have further remarks to offer. Sorry for the delay.
