Hi Tom,

I enjoyed the meetings last week with you and your staff. I know that your time with DOH is now very short, so I wanted to forward you the key action items from our discussion on the Lahaina injection wells. I hope that you will be able to speak with Ted and Alec about item #2 below and give us some feedback on this matter. Per item #1, I expect to send a draft of the 308 letter by tomorrow.

I am out of the office starting this Friday, but will be monitoring my email during the holidays.

Mahalo and Happy Holidays,
David

Action Items from the Lahaina WWRF Discussion:

1. EPA will provide DOH with a draft of the CWA section 308 letter to Maui County; DOH will provide any input on monitoring/data collection that they deem would be helpful for evaluating the potential impact of the injection wells at Lahaina on the coastal waters.

2. Tom A committed to consulting with DOH counsel on the State's perspective regarding the scope of CWA section 401 authority as it pertains to Lahaina's injection wells, and on DOH's options for addressing a 401 certification application from Maui County for their Lahaina WWRF.
