Subject: RE: EPA Certification Application - Absolute 63 Pellet Heater (Report Number 0135PS036E.REV001)
Attachments: Absolute 63 EPA Application.pdf

Good Morning,

I have attached an application for a certificate of compliance for the model Absolute 63 pellet heater manufactured by Hearth & Home Technologies, Inc. – Halifax. I have sent via mail all required documentation for the Non-CBI test report, application for certification and certificate of conformity, since we had trouble with emailing the large files in our last submission. I have also sent via mail all required documentation claimed as confidential business information to the EPA CBI Office.

Could you please let me know when you receive the information and make sure that the USB drives work.

If there are any questions please do not hesitate to contact me.
