---

Hi Peggy,

This list looks OK with me. I went through your comments and looked over the pre-CERCLA screening reports for those that I had copies of to see if anything stood out as a reason to keep them in Site Assessment. Ultimately I think almost all of them could stay in Site Assessment due to the new Subsurface Intrusion Component of the Soil Exposure Pathway in the HRS but if they can be investigated by a non-CERCLA authority more expediently, they can always be brought back into the CERCLA world if needed. If you list these sites in a letter and describe how they will be addressed under another State authority, I will place a copy of the letter in the site file and update the SEMS data to reflect: "Not a Valid Site – State Lead." The sites will be moved into the "archived" portion of the SEMS database, so they will be considered inactive. If CHS enforcement finds reason the site should be addressed under CERCLA, we can unarchive the site using the new information they may have and continue with the pre-remedial process. If eventually CHS Enforcement doesn't get to investigating the site and you want to make it a pre-remedial priority, we can unarchive the site and include it in a future cooperative agreement workplan.

**Subject:** Sites proposed to be transferred to CHS

Hi Joe, we came up with this proposed transfer list as modified from your original workshare table. If you are okay with these, we will start submitting those letters and documents you need.
