---

Katherine,

Here's the raw data. I'm writing up the data summary. Let me know if you have any insights.

Subject: Call next Tuesday Nov. 27th about Lagoon BMI TMDL

Hi Cindy,

I talked to Mark Abramson today about the Lagoon BMI and we didn't get very far unfortunately. The only general things we came up with were setting some sort of improvement levels in BMI community – maybe through a diversity index or an increase in pollution intolerant bugs or decrease in pollution tolerant bugs. Has anything like this ever been done? I just don't know how to justify any numbers unless there are studies that have done this previously in a similar system. Anyway, I'd be happy to talk about this more next week if you think it's useful. We can try to loop Kirsten and Mark in also if they're available.

How about we chat at 10:30am on Tuesday morning?

Thanks, Katherine

P.S. Mark sent me his bug data from the Lagoon – can you send me yours too so I can try to look at it before we talk.
