Sounds like a great idea to me. Why don't you send out a doodle poll? Looks like I'm available M, T, F that week.
Karen Larsen would like to invite you to attend her next BioObjectives Steering Committee meeting. It has Pete and I, plus a few other regulators; Tom Suk, Lilian Busse, Rik Rasmussen. I don't think they have a date set yet, but I know they'd all like to hear more about your TMDL

Hi Ken,

Folks have been busy getting the O/E and MMI calculated after Rafi sent us the model input parameters. There are still some things being worked out but I think that the beta-testing has been great.

I'd like for us to set a time where we can sit down and go over the Malibu results with you, Pete, and Rafi and Mike Paul and others on the phone. Can we see when might be good to do that in April. I'm hoping we can try to pinpoint a time after April 15th. Let me know your thoughts.

Thanks.

Cindy
