Subject:	Closing Report: 35-TUL-16 (32 field workers experience symptoms while pulling leaves in a grape vineyard)
Date:	Thursday, March 16, 2017 3:10:35 PM
Attachments:	35-TUL-16 Closing Report.pdf

On May 26, 2016, at 6:00am, licensed farm labor contractor crews started pulling leaves in a 49.47 acre table grape vineyard located near Visalia, CA. While working in the vineyard, thirty-two workers experienced symptoms of itching skin; irritation, burning, itchy, watery, and stinging of the eyes; dizziness; headache; runny nose; neck ache; dry mouth; and feeling nauseous. The field workers reported their symptoms to their supervisors and one worker was taken for medical attention. An application of Wilbur-Ellis Dusting Sulfur had been performed to the vineyard on May 23, 2016 and the Restricted Entry Interval of three days expired on May 26, 2016, at 2:30 a.m.

Enforcement action pending
