Subject:	15-Day Report 17-SBD-17 Two Men Ingest Mouthful of Triple Two Disinfectant
Date:	Wednesday, March 29, 2017 11:36:22 AM
Attachments:	15 Day Report 17-SBD-17.pdf

On March 7, 2017 Two males (age 34 and 45) each ingested a mouthful of disinfectant while attempting to siphon an antimicrobial product from one drum to another drum and were admitted to a hospital overnight.

Update:

SBD CAC investigation determined both vitims were not wearing any personal protective equipment during the activity which resulted in exposure. The 34 year old still had a sore throat two days after the incident.

The SBD CAC continues to investigate this incident.
