Subject:	Closing Report 31-SCL-17 (62 year old male admitted to hospital after attempting to make mouse bait from methoymyl)
Date:	Tuesday, March 13, 2018 4:33:37 PM
Attachments:	31-SCL-17 Priority Closing Signed.pdf

Good afternoon,

On April 9, 2017 a 62 year old male home owner was transported to the hospital via ambulance and admitted after attempting to make mouse bait out of Golden Malrin Bait 1.1% methomyl which he purchased over the internet. The 62 year old male was admitted on April 9, 2017 and discharged on April 10, 2017.

Santa Clara County Agricultural Commissioner's (CAC) Staff conducted a phone interview with the 62 year old male and they were informed that 2 weeks later he went back to the hospital after visiting the storage unit (where he previously attempted to make the bait). He has asked the CAC to close the case.

No violations were found during this investigation. No further action will be taken.
