Subject:	Priority Episode Notification Report 12-IMP-18 $300,000 Reported Lettuce Crop Loss
Date:	Friday, March 09, 2018 12:03:58 PM
Attachments:	image003.png 12-IMP-18 PENR.pdf

Hello everyone,

On March 6, 2018, the Imperial County Agricultural Commissioner's (IMP CAC) office received a Report of Loss, Nonperformance or Damage in the amount of $300,000 for reported loss of a 25-acre romaine lettuce crop. The grower alleges that the pest control business that treated the romaine lettuce field, on January 6, 2018, used application equipment contaminated with herbicide (Osprey/Mesosulfuron Methyl) resulting in yellowing of leaves and stunted growth of the crop.

The IMP CAC continues to investigate this incident.

Please see the attached notification report for 12-IMP-18.

Thank you,

Misael Martinez
