I'm fine with those changes, but also out of the office today.

Lynn/all,

A couple of quick comments on the latest draft of the briefing:

1) First, I'd move the SBREFA bullet from the back of the briefing and move it up under the Analysis and Outreach Section. Along with Scientific, Economic and EJ Analyses, there is a high probability that we will need to do an "Initial Regulatory Flexibility Analysis", unless our screening analysis can support a certification that the proposed rule will not have a significant economic impact on a substantial number of small entities (SISNOSE). Either way, an analysis of the impacts of any potential increased burden on small entities will need to be performed.

2) Under stakeholder involvement bullet (slide 13), I would specifically mention "small entities" in addition to "regulated entities"

3) On the schedule, we may want to consider adding a milestone that acts as a placeholder for the SBREFA process---likely 6 months. Ideally, this is supposed to happen before Option Selection (smile)

4) Also do we want to add to the schedule when we believe we will start to get data back from the AMS on a rolling basis? I head spring of 2011.

Let me know when OEM is ok with the package. The ADP calls for getting this out to the participating AA/RA's 5 working days before the Early Guidance meeting (which is this Thur the 16th). It will also need Mathy/Barry approval before it goes out.

Thanks.

Lynn

based on the notes I took from Barry, I believe that you covered his points. I did think that we did not want to use the word "option" and and would recommend that slide 9 just say Regulatory Approaches for Consideration and just list them under CERCLA and EPCRA as you have done , but take out Option 1, 2, 3. I also had a note to keep this option on the table [redacted]".

I also had another note that was direction from Barry for the future to check with the regions to see if EPA ever responded due to a report and to put a memo together to prepare a record that we don't need the reports to respond - and write up questions for OGC since it seemed that they were confused about the CERCLA reporting - but I may have misinterpreted what Barry was asking.

I am out tomorrow - Dana is here and once you get her OK you can send to the workgroup. I walked away from the pre-brief with the plan that while Mathy or Barry would kick off the workgroup - Dana would brief.

Dana/MaryAnn,

I have further streamlined the slides for "Regulatory Approach - Development of Options" to avoid getting too into the weeds during the Early Guidance meeting. I removed the detail under options that needs a greater level of fleshing out than is appropriate for the EG meeting (i.e., the workgroup will explore further and prior to Options Selection).

The changes will keep the focus on levels of reporting (i.e., degree of exemptions) rather than details/mechanism of reporting.

thanks Erik. Remember this is Early Guidance and not option selection so how workable "options" may be would need to be further fleshed out (at the direction of Sr. Management through early guidance). With respect to Continuous Release Reporting, the reason for suggesting it [redacted]

Thanks Lynn, on the point about the poultry petition, I would phrase the issue like this on the slide:

- Poultry Petition
  - Submitted to the Agency in August 2005. Official Agency response remains outstanding. We may receive comments on it as part of this rulemaking.

- Should Agency respond to petition as part of this rulemaking.

Dana/MaryAnn,

I've attached the revised powerpoint (based on Monday's pre-brief with Barry), and updated Preliminary Analytic Blueprint.

[attachment "EARLY GUIDANCE 12-16-10.pptx" deleted by Erik Swenson/DC/USEPA/US] [attachment "Preliminary ABP_CERCLAFarm.docx" deleted by Erik Swenson/DC/USEPA/US]

A few things to note on the ppt: The Regulatory Approach - Development of Options pages (9-12) were re-formatted and revised slightly for clarity. Slide 13 was added to state OSWER's recommendations. Slide 17 - added Poultry Petition as an "Other Issue" at the request of [redacted]

The Preliminary Analytic Blueprint will be further developed/revised after Early Guidance. The Detailed Analytic Blueprint is due in mid-January.

Kim has reviewed the powerpoint and is ok with sending to you directly.

I believe that Richard Mattick wanted to get the Early Guidance materials out by Thursday (12/9).
