Subject:	15- day 20-FRE-16; 11 solar farm workers experience symptoms after drift from a ground application to pistachios. None hospitalized.
Date:	Tuesday, May 10, 2016 9:59:13 AM
Attachments:	15-Day Report 20-FRE-16.pdf

On April 18, 2016, eleven solar farm workers were possibly drifted on from a ground application of the pesticides Luna Experience and Lambda-Cy being applied to a pistachio orchard adjacent to a solar farm construction site. The workers reported symptoms of headache, eye, nose, and throat irritation, and one of the employees vomited. Emergency services were dispatched and Cal Fire decontaminated the eleven workers before they were transported to three local hospitals, evaluated and released.

Fresno CAC staff have collected clothing and gradient samples. Fresno CAC is continuing to investigate the incident.
