SUBJECT: Fuel Oil Spill in Duck Valley Ind. Reservation

SUMMARY OF COMMUNICATION

I returned his call. He had reviewed an internal memo regarding a fuel oil spill on the Duck Valley reservation in the Oywhee community in Nevada. He doesn't know when the spill began, but it may impact a drinking water well. BIA & IHS can't find $ to clean it up. He believes that someone from EPA has been involved, but he doesn't know who. I told him the requirements for cleanup would depend on whether the material was TCLP hazardous waste + whether it leaked from a pipeline or an UST. He said he thought samples had been taken + that it was from a pipeline. He did not have a great deal of information; however he referred me to Warren Sedlecek (pronounced Sédlecheck or Sédlagic) at the Elko, NV BIA area office (no phone # provided).
