Subject: Lower Ley Creek update
kmurphy@wladislawfirm.com

Lauren:

The County has taken a look at the data you recently provided concerning Ley Creek. The County would like to take you up on the opportunity you offered to arrange a conference call w/ Pam Tames, the Project Manager. If acceptable to you and Pam, we are amenable to having David Stoner, the County's consultant, talk directly w/ Pam Tames and Luis and I would not participate. If that is acceptable, I have provided Mr. Stoner's e-mail contact information below and Ms. Tames and Mr. Stoner could communicate directly w/ each other to schedule a time to talk. If you prefer that counsel participate, Luis and/or I will sit in on the call and I can handle the scheduling for all at this end.

The County also will accept your offer of a CD copy of the OLCC remedial investigation performed by NYSDEC's contractor. It can be forwarded to my attention.

Thank you for the updated information and your continued assistance.

Subject: Lower Ley Creek update

I wanted to provide you all with an update on the Lower Ley Creek Subsite. Attached is the sampling location map, trip report, and data from the mobile lab from the most recent sampling event (September-October 2011). The mobile lab tested for two arochlors (I1248 and 1260). About thirty-percent of the samples were also sent to a non-mobile lab for further analysis of other PCBs and contaminants of concern. I will provide this data to the group when it becomes available.

In addition, EPA and NYSDEC have agreed that the area known as "Old Ley Creek Channel" will now be addressed as part of the Lower Ley Creek Subsite. This area is hydraulically and geographically connected to Ley Creek and contaminated with PCBs and other contaminants of concern that similarly impact Ley Creek. This determination was based on the data from the OLCC remedial investigation performed by NYSDEC's contractor, which I can provide you on a disk upon request.

Please let me know if you have any questions. If there is interest, I can arrange a conference call with the remedial project manager, Pam Tames, to go over any questions you have regarding the sampling data.

Regards,

Lauren P. Charney
