Water Quality Standards

Willamette Mercury MDV

Advisory Committee Meeting #2
Draft Agenda

December 10, 2018
Willow Lake Water Pollution Control Facility
5915 Windsor Island Rd N,
Keizer, OR 97303

Time	Topic	Who
10:00 a.m.	Introductions and agenda review	Alex Liverman
10:15 a.m.	Highest Attainable Condition – overview	Debra Sturdevant
10:45 a.m.	HAC Process	Aron Borok
Noon	Lunch	
1:00 p.m.	Variance duration	Debra Sturdevant
1:30 p.m.	Mercury minimization plans	Aron Borok
2:15 p.m.	Next steps and closing	Alex Liverman

Objectives

- Committee members understand the federal requirements regarding the highest attainable condition as well DEQ's draft process for determining the highest attainable condition, or highest attainable effluent condition, for a facility.
- Committee members have the opportunity to provide input regarding the process and factors that DEQ will use to determine the highest attainable condition, including technological, financial and environmental feasibility of potential treatment upgrades.
- Committee members understand how mercury minimization plan implementation contributes to mercury reduction.

Materials

Description of Highest Attainable Condition Requirements and Process
