Subject: Paden, WV and PCE contamination in well field

Good afternoon Patrick,

An inquiry has come to my office regarding Paden, WV and PCE contamination in drinking water wells. Do you know if all of the wells which showed any contamination are out of service? Do you know what the level of PCE is in the finished water going to the distribution system? Is there a "do not use" or "do not drink" order in place for Paden, WV?

I know that some of the emergency response folks (EPA and WV DEP) have been on site addressing remediation. It is my understanding that some air stripping equipment exists. Can you confirm?
