Makes sense on the Grand Coulee. That's a lot of red. I wouldn't be surprised if every dam has an EJ community around it. Thanks for doing this.

Hello Jenny,

I will send these one at a time, since they may have different results.

First one is regrettable, 81st percentile at the facility location, 88th percentile at the location across the river and slightly downstream.
For each census block, the top score is for the EJ Index from Cumulative Direct Water Discharge.

Hey John,

Can you do EJ screens for the 9 dams I'm working on? No huge rush on this, but by the first week of August would be great.
