Subject: NMED NPDES Priorities prior to February 15

Hi Stacey – Welcome back!

Shelly asked me to send you a list of priorities for NPDES issues over the next three weeks.

- Are there any permits going out for public notice during the CR? If so, which ones? We would need to complete our Limited English Proficiency analyses quickly if there are permits planned for notice.
- How will we handle the certifications for Reserve WWTP and ABCWUA? They come off public notice February 4th, and our certifications are due on February 20th. Do you want our certifications to be to you by February 15th? Additionally, we can have the certifications for the CGP updates to Region 6 by February 15th as well.
- LANL IP – we met with LANL last week and they indicated that they were planning to submit the reapplication material in February.
- sMS4 permit – is there any update on finalization of the permit? We would need some warning as we will have to ramp up involvement with all of the UAs to put together their TMDL plans and their monitoring plans.
- MS4 designation decision – Los Alamos – any word? Is the plan to still have a meeting with DOE and their new contractor, Triad National Security, NMDOT and Los Alamos County?
- CGP – Canada del Carro – this is a construction site that has some activities that could be considered silvicultural and Suzanna Perea was waiting for an answer from HQ on if the project was exempt from permitting. We have significant concerns with erosion at the site and would like to address it before spring runoff occurs.
- CGP – construction sites discharging to "non-WOTUS" waters (i.e. Las Cruces complaint)
