Wilcox Well Resampling

Voice message from ODEQ Todd
6/25/2014
Info about the issue of resampling some wells. This is being done mostly as a public relations for the purpose of addressing some concerns of the residents and their Division Director. Involve sampling of some 8 wells for onsite and adjacent residents.
His grant funding does not allow …..
The state will need to use the state lab …….

Info from Todd:

Amy had a discussion with John or Cathy to get credit somehow for this work. He cannot do out of his project.

Wells sampled doing PA and SI phase, some residents with concern. They offered the residents to resample because so much time has gone by.

He has not seen anything above the MCL or close to MCL but is old data.

Todd provided copy of the sampling plan by email, completed 6/23/14. The plan covers for sampling 8 homes, with 4 kinds of QA/QC samples. They are also looking to repeat quarterly. Sampling is for metals, VOCs and semi VOCs.
