> Parchment will be lifting the Do Not Drink order on Monday. PFAS levels are low. LCR levels for their first draw samples are below the action level. Public education will be provided via the Kalamazoo Health Department that includes health effects information and ways to mitigate exposure. Investigative LCR sampling will continue, including sequential sampling.
>
> There will be a local press conference on Monday. I believe there is some bottled water available even after the order is lifted.
