U. S. STEEL – MINNTAC SWPP PLAN

WORKSHEET 3

Significant Materials Exposed to Storm Water

Significant Material	Period of Exposure	Method of Treatment
Excavated Contaminated Soil Piles	Continuous	Area is isolated from runoff
Pellet Piles	Continuous	None
Agglomerator Step III Reclaim Concentrate Piles (sprayed with glycol)	Continuous	None
Demolition Landfill	Continuous	Located in the south central portion of tailings basin
Crushed Ore Oversize Piles (previously sprayed with glycol)	Continuous	None
Salvage Yard	Continuous	Parts are drained of oil before being stored outdoors
Woodchip Silo Unload Area	Continuous	Storm water from this area flows to tailings basin
