Kevin:

I appreciate all the work you are doing to make this project a success. I understand the situation and the fact that you guys have to do extra work because of the Health and Safety issue that SWS had on an unrelated project. This extra work is a CB&I requirement and not a Government requirement. Therefore, it is my position that it is not chargeable to the Government.

Thanks

I agree on the normal subcontract/procurement pre-qualifications.. Jeffrey however had to step in and prepare mitigation documents because of the fatality just to get them on this project.. I had nothing to do with the original pre-qualification package.. I know because of the severity of the event that had had he not worked this for me and this site we would not be using them.

Leroy if this is Gary stance finalize how he wants and a comment on why we don't agree for this one instance of preparing and reviewing the mitigation plan..

Kevin:

I talked to Leroy about the charges below and he indicated that he had discussed this with you. The basis for my denial of the charges are:

SWS is a team subcontractor under your currrent contract with the EPA. As such, the EPA should not be paying for a prequalification of an already existing team subcontractor under the contract.

Thanks

Leroy:

These are my comments on the Draft:

3-P Service Date: 09/05/14, 1053533, Ind Hygienist/Safety - SWS Environmental subcontractor prequalification process

I should not be paying for a prequalification process for a Team Subcontractor. This is a process that is part of your costs for managing your team.

6-P Service Date: 09/05/14, 1260885, Subcontract: - Developed Option year 8 rates and added info for the SOW and Requested more info to pre-qual SWS Teaming Partner

I am not sure what "developed Option year 8 rates" is but it sounds like something that is not site specific and part of having the contract. Also, I should not be paying for anything associated with pre-qualifying a team subcontactor.

18-P Service Date: 09/02/14, 1092949, Response Manager: Started research of Task Order 62, started procurements, work plan

I am ok with this charge but I would say "Conducted research on the Project ....."

19-P Service Date: 09/04/14, 1260885, Subcontract: Worked with SWS to get Paperwork current and submitted for H&S and QA Approval

Again, I don't believe I should be paying for something that is not specific to the Site. This is a process associated with you guys having a teaming arrangement with a contractor and your management of that teaming arrangement.

Thanks
