Subject: Parcel G - Maybe 20-40% of site, depending what you want to count.
Attachments: Pre-Draft HPNS Rad Parcel G Work Plan_052418_figure.pdf; Surface Area Tetra Tech work vs total parcel.xlsx

See attached map - Parcel G has very large bldgs., and as a starting point, I counted the entire bldg. footprints of the bldgs. On the attachment. I think the estimate for all the remaining bldgs Might be a little high, so I'd say 35-40%. The Navy is not proposing to rescan all of the current bldg. interiors, only a subset. So if you want to count only the areas that they aree proposing to scan, maybe the total would be closer to 20% (estimating 150,00 sf)

Parcel G Only	
Buildings	
185000	sf Bldg 411 (from RACR)
100000	sf Bldg 439 (from RACR)
200000	Other bldgs (eyeball)
485000	total
11	acres
Trenches	
22449	ft length of storm drain sewer lines
8	ft width
179592	Total square feet
4	Total acres trenches
15	total acres bldg sites and trenches
40	total acres
39%	of total
