Team,

The data acquisition for this morning is complete. There were no detections during the automated processing while in flight. See the attached images for the data collection path and locations. We will be downloading and reviewing the data for quality assurance and detections not available through automated processing. We anticipate a draft report some time early afternoon. The updated google earth link is estimated will be completed around the end of the business day. Please call my cell if you have any questions.

Team,

The weather is good today. We will be conducting a data acquisition flight this morning targeting the area of the tank farm, the downwind area and the confluence of the waterway to the harbor. If there are additional areas that the team would like to acquire data from please let me know. The plan is to have the aircraft over the target areas at 09:30 am. Please call my cell phone if you have questions.
