---

Good afternoon,

The Cayuse has just arrived to target location SC-S019 (RM 2.7). NW Natural representatives will not be monitoring the coring for S019, as previously intended. However, the Gravity crew has identified the target location to be directly beneath a barge, scheduled to depart “sometime today”. If the barge plans to depart this afternoon, the target may have to be revisited to retrieve a sample core. The Cayuse will station itself near the barge until they hear word of the barge schedule.

Jonni
