Re: Meteorological QA Plan

Dear Mr. Fowler:

The U.S. Environmental Protection Agency (EPA) is approving, as submitted, the "Meteorological Measurements Quality Assurance Plan (QA Plan)," for the Colbert Landfill Superfund project, dated December 28, 1990. The plan was reviewed and found to meet EPA requirements and criteria for meteorological measurements. The Washington Department of Ecology (Ecology) has three comments that do not effect this EPA approval, but do have to be addressed in a letter to Ecology.

The changes to Section V.D. of the Colbert Landfill Consent Decree, Scope of Work, that were discussed in a meeting on October 1, 1990, and forwarded in a "Technical Memorandum" dated October 25, 1990, were previously agreed upon. These changes can now be fully approved and incorporated into the Scope of Work along with the approval of the QA Plan above.

If you have any questions concerning this approval, please telephone me at (206) 553-7177.

Sincerely,

Neil E. Thompson
Project Manager
