Subject: Final Navajo uranium paper

Jared, here is the final paper. Per my conversation with Teddy, I addressed input from Jim Woolford in OSWER and I assumed Al Almendariz's email to Bob speaks for itself.
As additional context for this story, the NYT reporter visited Skyline Mine last summer during the cleanup and spoke with OSC Jason Musante as well as Clancy Tenley, Nicole Moutoux and Margot at that time. The reporter then wrote to Betsaida on March 9 asking for additional info re how priorities are set among mine cleanups and imposing other controls. Betsaida asked Margot to respond and on March 12, Margot provided a written response to the reporter (I'll forward the email trail to you in case you want to see it), which includes some identical language about priority-setting and the scale of the problem as in the attached paper. This response was copied to both Betsaida and Jim Woolford in OSWER.
