Hi Gloria,

Here is the internal deliberative draft that co-authors are reviewing. SM file will follow.

John

Can you share it with me? I will NOT share it, and I will definitely NOT use anything from it in my talk. Andy raved about how great it is.

I am going to just talk about the ORD study in NJ in a general way, consistent with what we have said publicly previously – like what we said in our comments to USEPA on the GenX draft risk assessement.

Yes I have a draft, but I doubt EPA would let those figures be presented. Erica and Sandra have my draft. You could ask them or I am willing to share the draft with you with a promise to keep it confidential.

Thanks John. Andy told me that you have a fantastic draft paper, but I guess the figures aren't shareable yet.

Thanks
Gloria

Hi Gloria,

I don't have any cleared slides or images – I don't make it to many meetings. Sorry.

Thanks-
John

Gloria,

Find attached my slides from the ACS meeting in Orlando in March and the recent SETAC PFAS FTM.

Both have slides you are free to use.

Mark

Mark and John,

I am giving a seminar on PFAS at the Rutgers Environmental and Occupational Health program in a few weeks. It will be an overview of PFAS in general and the work that we have done related to PFAS (occurrence, risk assessment, etc.).

I am going to mention the project that you are doing with NJDEP. This will be of interest to the Rutgers people since they were just awarded the ATSDR grant to do biomonitoring and health studies in the communities near Solvay.

Do you have any slides about your NJ project that I could use? I would just show the slides – my presentation will not be shared by email or posted online.

Thanks,
Gloria
