Hi Lisa,

In the attached, I have edited my slides to address your comments.

Thanks,
John

Caroline,
As we discussed this 'detective story' is hard to follow…slide 16 is not clear.

Our audience for these calls is mixed – managers and staff in state environmental agencies – and take away messages will need to be at a high level.

Please work from this version, and we can discuss more on Tuesday. Have a great weekend!

Lisa

Subject: RE: Presentation of ORD/NJDEP work at next EPA ECOS call

Hello Lisa,

We've checked with Brian Schumacher (EPD Division Director), and he is in agreement with removing the phrase "Internal Deliberative Draft" from the slides. This small change will not necessitate clearing the slides over again.

The material in this presentation is included in a manuscript that has been submitted to a journal and is currently in the journal review process. Because the paper has not yet been published, we don't want the slides to be cited or shared beyond the ECOS audience. Would it be possible to include the phrase "Preliminary results. Please do not distribute or cite." at the bottom of each slide? If your format won't allow for this footnote on each slide, we'd like to at least add the phrase on the first slide.

Additionally, we'd like to insert a slide at the end of the presentation noting that the results have been submitted in a journal publication and delivered to the NJDEP as a report. John will provide a slide with the citation for the future journal publication and the report when he returns to work on Tuesday, if that's okay with you.

Thanks,
Caroline

John,

These slides will need to cleared again, i.e. for each presentation.

Caroline, if you are working today, please give me a call and we can strategize how to get this done.

Tim

Hi Erin,

The attached Word file includes my title and paragraph abstract for the presentation that Tim Buckley suggested for ECOS. All of this content has been cleared previously. I paste this draft below my name in this email as well.

All my slides will be from previously cleared slides that were presented at NJ. The abstract is taken from our cleared manuscript, with a few clauses removed to simplify.

If any of copied managers have concerns, please let me know and I will retract or modify.

Thanks,
John

Subject: RE: Presentation of ORD/NJDEP work at next EPA ECOS call

The audience is mixed – managers and technical staff. Presentation should be more high-level, easily understandable, and not overly technical. Examples/case studies of how NJ and other states are using/benefitting from the source signature work should be included.

Great, thanks! The presentation should be 15 minutes long. We'll need the title and a paragraph description to include on the agenda by Tuesday, February 4.

Given the holiday the Monday before the call, please send draft slides by Friday, February 14 to Erin McCabe and me.

Let me know if you have any other questions.

Andy,

I agree with this take. Also, I wonder if we could have Erica introduce.

Lisa, can you confirm the slot is still available and the amount of time allotted.

Tim and John,

It is good to hear that the NJ DEP work can be presented during the next ECOS call. I think it will be helpful for folks to understand that PFAS source signature work is possible and potentially very helpful in various contexts. (In my call last week with R1 and Maine DOH, the description of the NJ DEP work seemed to be help confirm their ideas that this kind of work is possible and potentially very specific.)

For this upcoming ECOS call, I suggest John provide the entire overview. A single coherent voice will help communicate the message most effectively. I'm also very happy to help in any way if needed.

Thank you very much,

Andy

Hi Tim,

Any option (Andy alone, me alone, or Andy plus me) is fine with me. Just let me know what you/Andy decide. If I am involved, let me the intended audience and depth of detail desired. I will draft slides for that purpose and then discuss editorial suggestions with you.

John

Subject: FW: Presentation of ORD/NJDEP work at next EPA ECOS call

John and Andy,

ORD has a monthly call with ECOS related to PFAS with states and ORD presenting relevant activities. There is a 15 min slot open on Feb 24th (4-5 PM). If one of you is available to talk about your NJ source signature work, I think that it would be of great interest to this audience. I checked with Erica (see below), and she indicated that NJ DEP was supportive. Let me know if you are able and willing.

Thanks.

Tim

Erica,

I am wondering if you have any objection to EPA (John Washington or Andy Lindstrom) presenting our collaborative PFAS source signature work at the next EPA ECOS call on Feb 24th. It will be one of two presentations and therefore need to be fairly brief, i.e. a subset of slides from our briefing last Dec. I am checking with you before discussing with John or Andy.
