Subject: suggested ports op-ed

Jared,
I don't know what exactly you wanted to say but here is a suggested op-ed. It is short - less than 700 words and written for the general public. The ports conference actually goes until Friday morning, so this can be timely any day this week. I know Kelly is trying to make contact with the op-ed departments.

Please note that in the op-ed I directly say we need new innovative technologies if we are to attain in the SC. I know that not everyone is comfortable making that statement so I wanted to flag it for you. This is also in your remarks.

Please let me, Elizabeth or Penny know if you have questions. Once you make edits, I can incorporate and pass on to Kelly and Bill for submission. We have not seen a PR from the Port of LA yet. Perhaps we can draft something using the verbiage from the op-ed?

Thank you,
Niloufar
