Thanks Brian. Let's discuss if the traffic will bear expansion of the agenda. Marianne, do you have insights on that front?

Subject: RE: OITA-OAR Coordination Meeting

Joe and Marianne,

Aside from the work in the EGBCM (OAR lead) and ACAP (OITA lead), please be aware of the following:

PAME (Protection of Arctic Marine Environment) Working Group has at least four projects that relate to EPA equities:

- *Report on current and potential use of alternative fuels, including LNG, in Arctic shipping* (supports AC and IMO work to ban HFO in Arctic shipping)
- Preliminary work on *establishment of Arctic low-impact shipping corridors* (to avoid accidents, spills, marine mammals, etc.)
- *Arctic Shipping Traffic Database System*, managed by Norwegian Coastal Administration and USCG (can help us better *understand fuel use and emissions*, etc.)
- *Research on Arctic marine litter and eventual development of Arctic regional action plan on marine litter* (2019-2021)

Arctic Monitoring and Assessment Program (AMAP) Working Group: *AMAP will start work on an updated assessment of radioactivity issues/concerns in the Arctic, and hopes the USA will provide an expert. DOE/NNSA hasn't responded. Is OAR open to discussing* this with USG's AMAP head of delegation?

This might be too in the weeds for the meeting today, but you should know this.

Brian

Anything to offer on the attic front - in addition to what Patrick may come to the table with?

>
> As we await a final agenda for tomorrow afternoon's meeting, I want to remind you that we need to be ready to speak to a number of topics per below: G7, G20, Arctic Council, WHO AQ, Minamata. I communicated with you last week about the Arctic Council item and my discussion with Amanda -- Wehrum has a baseline understanding of AC so needs no overview points, focus will be on EGBCM but you'll want to be able to speak to Ministerial or any general questions. I will prepare some points on WHO meeting for Jane. I'm coordinating with Paul A. and Rodges on Minamata.
>
> Please let me know if you're in direct communication with Martin about this (Brian I know you've communicated with him about some OAR topics) and let me know if you have questions. Patrick expects to be in the office tomorrow so can help and might actually have already given you something; check inbox. Thanks.
