If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

DISTRIBUTION OF MANIFEST COPIES: Copy No. 1 (Original): TSDF keeps - (send photocopy to DOHS); Copy No. 2: To Transporter after signed by TSDF; Copy No. 3: To Generator from TSDF; Copy No. 4: Generator keeps after signed by Transporter (send photocopy to DOHS).

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

DISTRIBUTION OF MANIFEST COPIES: Copy No. 1 (Original): TSDF keeps - (send photocopy to DOHS); Copy No. 2: To Transporter after signed by TSDF; Copy No. 3: To Generator from TSDF; Copy No. 4: Generator keeps after signed by Transporter (send photocopy to DOHS).

If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

DISTRIBUTION OF MANIFEST COPIES: Copy No. 1 (Original): TSDF keeps - (send photocopy to DOHS); Copy No. 2: To Transporter after signed by TSDF; Copy No. 3: To Generator from TSDF; Copy No. 4: Generator keeps after signed by Transporter (send photocopy to DOHS).

(Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

DISTRIBUTION OF MANIFEST COPIES: Copy No. 1 (Original): TSDF keeps - (send photocopy to DOHS); Copy No. 2: To Transporter after signed by TSDF; Copy No. 3: To Generator from TSDF; Copy No. 4: Generator keeps after signed by Transporter (send photocopy to DOHS).

If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.

DISTRIBUTION OF MANIFEST COPIES: Copy No. 1 (Original): TSDF keeps - (send photocopy to DOHS); Copy No. 2: To Transporter after signed by TSDF; Copy No. 3: To Generator from TSDF; Copy No. 4: Generator keeps after signed by Transporter (send photocopy to DOHS).

If waste not listed above, specify in Item 6 on manifest.

ITEM (7) If the waste is extremely hazardous, provide the State extremely hazardous permit number.

ITEM (8) Indicate the process, activity, or operation which generated the waste (Examples: aircraft cleaning, insulation, stripping, reactor cleaning, DDT production, alkylation, printed circuit board etching).

ITEM (9) INFORMATION MUST BE PROVIDED IN THIS ITEM 9, DO NOT LEAVE BLANK. Identify the major hazardous constituents in the waste along with probable upper and lower concentrations. (Examples: hydrochloric acid, lead oxide, phenol, PCB, cyanide, DDT, sodium hydroxide). Provide the approximate concentration of nonhazardous material.

ITEMS (10) (11) Check the appropriate boxes to show the hazardous properties and physical state of the waste. If a waste has more than one hazardous property (e.g., toxic and corrosive) check all appropriate properties (e.g., toxic and corrosive boxes). If the waste is an aqueous liquid, the pH must be reported in Item 11.

ITEM (12) Indicate by checking the appropriate boxes whether gloves, goggles, or respirators should be worn by persons handling the waste. Any special equipment, precautions or hazards should also be noted (Example: Sulfide solution will generate toxic gas if mixed with acids).

ITEM (13) Sign the manifest and provide your title and the date that the waste was removed from your facility. The person signing Item 13 shall be knowledgeable about the chemical and physical properties of the waste and shall be authorized by the management of the generating establishment to sign the manifest. IT IS UNLAWFUL FOR A TRANSPORTER WHO IS NOT THE GENERATOR TO SIGN ITEM 13.

TRANSPORTER:

ITEM (1) Provide the serial number of the manifest. The first three digits shall be your State hazardous waste hauler number. The six last digits may be any convenient combination of digits (e.g., sequential or chronological). For example, if your registration number is 899, the number of your one thousandth load would be 899-001000. The complete nine digit manifest number shall be unique for any five year period (Example: If you use manifest number 899-001000 on May 31, 1981, it shall not be used on a manifest again before June 1, 1986).

ITEM (14) Enter company name, EPA I.D. number, address and telephone number.

ITEM (15) Indicate the date and exact time the waste was removed from the generator's facility.

ITEM (16) Sign the manifest upon receipt of the shipment and indicate the date signed. The driver shall carry this manifest in a location prescribed in 49 CFR 177.817(e).

TSD FACILITY OPERATOR:

ITEM (17) Provide the TSD facility name and EPA I.D. number.

ITEM (18) If the quantity of waste is measured or estimated at the TSD facility (e.g., weighed), indicate the quantity.

ITEM (19) If the waste is applied to the land (e.g., surface impoundment, landfill, injection well, or land treatment area), the State hazardous waste fee must be sent to DOHS. Indicate the fee in Item 19.

ITEM (20) Write in any discrepancies noted between the manifest information provided by the generator or transporter and that found when the shipment was delivered to the facility. (Examples: differences in quantity or character of waste, container type, or vehicle type). Some significant discrepancies are described in 40 CFR 264.72.

ITEM (21) Check the box(es) to indicate the method(s) used to handle or dispose of the waste at the hazardous waste facility. If the waste is treated prior to, or instead of, land disposal write in the treatment method (Examples: neutralization, incineration, oxidation).

ITEM (22) If the waste is held at the TSD facility prior to eventual shipment to another facility for treatment, storage, or disposal, provide the name of the designated final TSD facility and its EPA I.D. number. In such cases, you, as the facility operator (transfer station), shall fill out a new master manifest indicating your facility as the generator of the waste and describing all the wastes in the shipment. Completed copies of all original manifests associated with the original waste shipments accepted by you shall be attached to the master manifests.

ITEM (23) Sign the manifest, provide your title within the organization and indicate the date that the shipment was accepted at your facility.

The facility operator shall send a copy of the completed manifest to the DOHS, on a monthly basis, or as otherwise required. If wastes are received from transfer facilities, the final TSD facility shall send copy number 1 of each master manifest to DOHS with copies of all original manifests STAPLED to it.

Transfer facilities shall send only one set of copies to DOHS to satisfy the manifest submission requirements for generators and TSD facilitity operators.
