Jared, KCBS called and would like to talk to you briefly this afternoon... Specifically, they want to ask about how the EPA Action Plan intersects with the Governor's (BCDC) plan to move water around in the delta. There is a paragraph about that in the talking points. Seems like the short answer is that EPA will be involved in making sure water quality standards are met as the BCDC plan roll forward. Karen sent us the latest daft of the talking points, attached. We will call you to let you know the timing for the interview, and we can have Karen join us on our end...
