Hello Jennifer,

I hope your day is going well. Did you ever get your voice back?

Scimetrics said to "go ahead and be proactive" so I made all the changes you requested except for the following one that doesn't make any sense to me.

In the "Use Restrictions" section, you said to add the following text: Do not use in edible product areas of food or feed processing plants or other areas where food or feed is commercially prepared or processed. Do not contaminate food/feed or food/feed handling equipment or place near or inside ventilation duct openings."

I cannot see the logic in adding this text when our use sites are strictly outdoor use sites. This product is not for indoor applications, including those in the text above.

For clarity, I added the heading "Personal Protective Equipment (PPE)" and put the appropriate text in that section, above the "User Safety Requirements" section.

Please let me know if I correctly interpreted the changes you requested.

Regards,
Kim

Good afternoon Kim,

I have enclosed a copy of the label for Kaput-D Pocket Gopher Bait with changes made. In addition, I have provided a word document with the same changes written out. As you may know, the Agency came out with the "Risk Mitigation Decision for Ten Rodenticides". On the word document, I made the suggestion as to what changes you could make to the label if you wanted to become compliant with the mitigation decision and that could be done all at once. Thanks alot and don't hesitate to contact me if you have any questions. Have a great day!

Jennifer
