Hi Cheri,

Just to follow-up my email from yesterday, I'm meeting with Dan this afternoon around 2:30, 3:00 to finalize the label amendments, I should have it to you by tomorrow.

Thanks,
Jennifer

Subject: JOB II Labels

Hi Jennifer –

Hoping to get an update on where we are with stamped approved labels. I'm getting a great deal of pressure from our Marketing people and we are in jeopardy of missing our print date as well as our launch date. Our drop dead print date is March 17 so I am sure you can appreciate what I am dealing with.

I know that one of the issues is the one ounce vs. two ounce piece of bait bar for the mice. The submitted label was changed per your comment; however, this is not feasible from a production standpoint. The bars are presently scored to be broken into two ounce pieces. The purchaser of this product would be unable to break the bars into one

ounce pieces. This statement has been on our label since the product was introduced in 2005 (the same language also appeared on the original JOB product which was marketed for several years prior to 2005). Also, there may be more than one mouse eating this bait.

Also, we have a correction on the Agricultural Use/Individual Pouch/Bait Bar label – the net contents should read 16 oz. rather than 1.5 oz.

Jennifer, I really appreciate your help in getting these labels approved as soon as possible. If you need further information or clarification, please give me a call. Thanks for your help.
