Yes, we will be keeping the storage as outlined. We have only submitted the plan to the county. Again, if everyone is in favor of the change, the SWM Plan would need to be revised.

Thx
Tony

Hi –

I have to discuss this our Division of Water and Tidal Wetlands folks. Will you be keeping the storage as outlined in the plan you forwarded to me? Have you submitted a copy of this plan to our Tidal Wetland folks or a construction plan to Division of Water?

H

Heidi, our proposal would be to eliminate all infiltration structures and introduce SWTS (aka Hydronamic separators). This would require a complete re-design of the system. The key to the issue is that DER is in favor of this change because of the existing residual contamination. With your concurrence, we would approach Nassau County with the change. Without your concurrence, the County will not entertain the idea.

Once we get buy in from all parties, we would re-design the system, size the appropriate number of SWTS's to treat the water before discharge to the creek. The system we are proposing is the same type of system approved by NYSDOT (and I assume NYSDEC) for the roadway project.

Thanks
Tony

All infiltration structures? I am trying to look at your civil drawings and determine what it is you are trying to replace. The schematic that Tony sent is for a specific type of situation and I need to make sure I understand where you are intending to us it. Or are you looking at the larger Vortech systems too?

Heidi,

RXRGIP is looking for DER's concurrence that, hypothetically, Vortech stormwater structures would be preferred over infiltration basins before we go to Nassau County with a new stormnwater plan. RXRGIP will have PS&S design a conceptual stormwater management plan (sans infiltration basins) to illustrate our proposal.

Thanks again for the speedy responses.

Thom

Hi Myralee –

Sorry for the piecemeal questions, but the structures you would like to replace with the Vortechs are those denoted as what on the drawings and details?

Heidi

Hi Myralee-

Did Nassau County already comment on this structure? Can you have the developer send us Nassau County's comments on the Stormwater Plan?

Thanks - Heidi
