Hi Tom,

In the WVU/ICCT report, it was mentioned that the correlation study performed at CARB included a CABR Semtech DS unit but didn't included any results from this or any discussion regarding the correlation of the different PEMS units. Can you share any results from this test or any information on PEMs coordinations that you may have performed?

Thnaks

Joel,

Thanks for the report, I see they did the study with the horiba OBS and Semtech DS. The report only shows finding from the OBS I assume because that is the device used during on-road testing.

Do you this it would be helpful to see if they have any data to share on the Semtech DS?

Thanks
Bob

Hi All,

Here is the WVU study report. The section covering the correlation to CARBs lab starts on page 50 of the report (page 66 of the PDF file).
