Subject: Re: NCA4 second order draft review deadline

Darrell - I hope you're using the macro feature to do a batch upload. If you have difficulties with that, the NCO staff can help out.

It's not something that we should suggest at this point, but we should give some thought to a Harvey text box. I expect we'll hear that from the NAS. I also expect that will fall mostly to NOAA and possibly USGS. But something to keep in mind.

Lastly, it looks like we are going to try to use the same clearance process to get this out the door for review as we did with the CSSR. Just starting to figure out how to approach that internally. A good topic for our Wed call next week.

Shanghai has been brutally hot - heat index near 120 (F, fortunately, although it seems like C).
