We will be figuring this out with the county in the next few days.
Essentially we can match whatever the county can contribute up to $150K.

Cindy
this is good news. How much money are we talking about?

I copied David Albright from epa's underground injection control office who
is the EPA lead. I am available this week and next to meet but David will
need to be involved.

Wendy

Hi Hudson and Wendy

I left you both an telephone message. We had some of our technical studies
funds that became available at the last minute and we are going to use this
to help Maui County address the EPA requested studies. This just happened
yesterday so we will be working with Maui County over the next week or two to
scope out the study and the cost share agreement. At this time we want to see
if we can justify using USGS for the work.

(1) Could you send me the letter you sent to Maui County with the requested
studies?
(2) Are you free over the next two weeks? I'd like to have EPA engaged in the
detailed discussions on scoping so that we make sure whatever portion(s) we
are able to do will meet the EPA requested information.

Thanks
Cindy
