Good idea. Let us kick that around internally – we are meeting today in preparation for a meeting with St Charles County Executive tomorrow. I'll get back to you today about that and see how quickly we can get a contractor out there.

We are also pulling together a work plan for a treatment application at and around PZ11 and one other location where we have access (real estate is confirming ownership). Barb Miller will be contacting the PM to set up a call for later this week.

Thoughts on sampling the effluent of the treatment plant? I know the technical folks had discussed it but maybe if you guys could get there and sample that could help ease concerns.
