Hi Myralee –

I am waiting to get comments from my technical staff, I hope to hear back from them by COB tomorrow.

Hello Myralee –

The NYSDEC has completed our review of your plan and have no substantial comments. However, EPA is in the process of completing their review, therefore, our approval is contingent upon approval from the EPA.

Thanks - Heidi

Hi
Have you had an opportunity to review the sampling work plan?
Thanks in advance for your time.

Hi Heidi,
Please review Ellis's attached plan and comment.
Thanks
Myralee

Subject: Glen Isle: SPLP/TCLP work plan

I've attached is PWGs work plan for collecting the lead and arsenic samples that will be run using either the TCLP or SPLP methods as discussed at the 12/2/14 meeting. The plan was developed based on our understanding of what the agencies requested.

Briefly, the plan identifies specific locations where arsenic and lead exceeded 50 and 400 ppm, respectively and selects a range of concentrations that would be analyzed to provide the leachate content.

Our understanding is that the agencies want to run TCLP for lead to see if the leachate has hazardous waste characteristics; and SPLP for arsenic to see if the leachate meets or exceeds groundwater standards.

The plan contains the specifics of where the proposed samples are located and how the collection and analyses will be conducted.

Please forward the plan to the agencies (DEC, DOH, EPA) for their review.

We would like to collect the samples early next week depending on comments/approval.

Thank you.
