Re: Discharge Monitoring Report – Second Quarter 2015
Platforms Ellen, Elly, and Eureka NPDES Permit CAG280000

Dear Mr. Blumenfeld:

This letter and its attachments include Discharge Monitoring Reports (DMRs) for the reporting period of April, May and June 2015 for Beta Offshore Platforms Ellen, Elly and Eureka.

All produced fluids from Platform Eureka are piped to Platform Elly for processing. Platforms Elly and Ellen are two separate platforms attached by a bridge, thus they have the same latitude and longitude listed in their DMRs. We have submitted separate DMRs for each of the three platforms since there are separate NPDES discharges associated with each platform. Oil production wells are located at Platforms Ellen and Eureka. Platform Elly serves as a processing facility and contains most of the production treatment processes. This is the only platform that may occasionally discharge produced water. There are no drilling related activities or wells on Platform Elly. Production fluids generated at Ellen and Eureka are sent to Elly for further processing and back to Ellen for injection.

Attachment 1: EPA DMR forms (3320-1) for Eureka, Elly and Ellen which were supplied by EPA on January 6, 2015.

Attachment 2: Listings of the chemical inventory for miscellaneous discharges (specifically non-contact cooling water) for each platform.

Attachment 3: Provides pre-dilution and post dilution chlorine results for non-contact cooling water discharges in accordance with Appendix C of the permit for each platform.

Attachment 4: Summarizes discharges that are prohibited.

Attachment 5: Includes copies of the official state certified lab reports and laboratory quality control reports and other permit required information (EPA Methods, sample dates, etc.) for each Platform.

Attachment 6: Chemical inventory for drilling mud used on Well A-36 for Platform Ellen. There were no drilling fluids discharged.

111 W. Ocean Blvd., Ste 1240 | Long Beach, CA 90802 | Office: 562-628-1526 | Fax: 562-628-1536

Discharge Overview

Drilling Muds and Cuttings (001):
On Platform Ellen drilling activities took place on Well A-36 with a spud date of March 27, 2015. The well was completed on May 2, 2015. There were no drilling discharges associated with this well. As required in the permit, the results of the drilling monitoring activities are included within the DMR reporting period occurring at least 45 days after the completion of the well.

Produced Water (002):
Produced water dilution – Platform Elly: On rare occasions when produced water is discharged, the discharge typically only occurs for a few hours or less. In calculating the dilution for each quarter, we use the average produced water daily rate based on the actual barrels of water per day "rate". As an example, if 100 barrels were discharged in one hour, the actual rate would extrapolate to a 2400 barrels of water per day (BWD) "rate", instead of only 100 BWD. This better represents the flow velocity used in the EPA Plume dilution calculation.

Well Treatment Completion and Workover Fluids (003):
WTCWF generated from Platform Ellen or Eureka would be commingled with the produced water at Platform Elly/Ellen. There were seven well treatment, completion and workover fluid type jobs performed during this quarter at Platform Ellen. There was no discharge of fluids. Chemical inventories are available on request.

Deck Drains (004):
Platform Ellen and Elly deck drains are commingled with production fluids and are processed at Platform Elly. Water segregated from the process is re-injected at Platform Ellen. Refer to Produced Water monitoring requirements in the DMR if discharged. Deck drain fluids on Platform Eureka are sent to a disposal well on Eureka and not discharged.

Sanitary and Domestic Waste (005):
Platforms Ellen and Eureka both operate a United States Coast Guard approved Marine Sanitation Device (MSD). Although these devices are capable of treating both sanitary and domestic waste, some of the domestic waste (as laundry water) is not discharged. At Platform Ellen, these domestic volumes are commingled with production fluids, sent to Platform Elly for processing, and returned to Platform Ellen for injection with produced water. The sanitary waste commingles with sink and shower water and is properly treated and chlorinated through the MSD, then discharged at Platform Ellen.

Platform Eureka also has sanitary and domestic waste water discharges (refer to the DMR). Domestic waste water (as laundry water) is sent to a disposal well and not discharged at Eureka. Sanitary wastes are treated through a USCG-approved MSD and discharged at Eureka. There are no sanitary/domestic waste discharges at Platform Elly.

The required annual Marine Sanitation Device (MSD) inspections were completed on May 30, 2015. The inspections included a chlorine test to ensure proper operation and chlorine results are included in the DMRs. The MSDs are in good condition and operating properly. The full inspection reports are available upon request.

Fire water (008):
Fire water at Platforms Ellen and Elly is commingled with deck drains and injected with produced water at Platform Ellen. The fire water and deck drain volumes at Platform Eureka are sent to a disposal well and are not discharged. The fire water was reported as not being chlorinated at all three platforms.

Non-contact Cooling Water (009) - Combined with Excess Sea Water:
Non-contact cooling water (as sea water) may be discharged at all three platforms. Separate discharges occur through separate outfalls for each of the three platforms. Seawater pumps deliver water throughout the platforms for use as non-contact cooling water, marine sanitation device feed water and for sanitary usage supply. Any excess seawater not used for these sources has been previously reported under uncontaminated water in the DMRs under a separate discharge (016). When the non-contact cooling water is discharged it can be combined with the excess seawater discharges at Eureka and Ellen. Since the platforms add low dosages of chlorine treatment to this part of the system, chlorine monitoring has been performed on the chlorinated discharges and if applicable, includes excess seawater in addition to the non-contact cooling water. Thus, the DMR reports the total water discharged for both sources (non-contact cooling water and excess seawater). Both volumes and chlorine results for the combined discharges are listed in the DMR under non-contact cooling water for Eureka and Ellen. Elly has only non-contact cooling water. Any separate uncontaminated discharges that occur, will continue to be reported independently under discharge (016) in the DMR.

The chemical inventory for non-contact cooling water (Attachment 2) was based on Operations' daily estimates using a Hach color wheel chlorine test kit.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. See 18 U.S.C & 1001 and 33 U.S.C. & 1319. (Penalties under these statutes may include fines up to $10,000 and or maximum imprisonment of between 6 months and 5 years)

Should you have any questions or require any additional information, please contact me at (562) 628-1526.

Sincerely,

Marina Robertson
HSE Manager

[1] Limits are post-dilution as listed in the new permit, Appendix C.

Attachment 4

Prohibited Discharges

ATTACHMENT 4
PLATFORM ELLY
Prohibited Discharges
April 1, 2015 through June 30, 2015

Prohibited Dishcharge	Permit Requirement/Limit	Monitoring Results
Free Oil [1]	0 days sheen observed on the receiving water during daylight hours	0 Days
Foam [1]	0 days foam observed on the receiving water during daylight hours	0 Days
Floating Solids [1]	0 days solids observed on the receiving water during daylight hours	0 Days
Surfactants [2]	Minimize	Minimized
Detergents [2]	Minimize	Minimized
Dispersants [2]	Minimize	Minimized
Produced Sands [3]	No Disharge	No Discharge
Halogenated Phenol Compounds [4]	No Discharge	No Discharge
Chrome Lignosulfonate [4]	No Discharge	No Discharge
Tracer Materials [5]	Limited	Limited
Garbage [6]	No Discharge	No Discharge

[1] Free Oil, Foam, and Floating Solids: Monitoring by visual observation of the surface of the receiving water in the vicinity of the outfalls shall be conducted during daylight hours.

[2] The discharge of surfactants, dispersants, and detergernts shall be minimized except as necessary to comply with safety requirements of the Occupational Health and Safety Administration and BSEE. The discharge to marine waters in response to oil or other hazardous spills is not authorized.

[3] There shall be no discharge of produced sands.

[4] Other Toxic and Non-conventional Compounds: There shall be no discharge of diesel oil. halogenated phenol compounds, or chrome lignosulfonate. Diesel oil discharge information will be located under the Drilling Inventory attachment when applicable.

[5] Radioactive tracer concentration above the background in the parent, discharge waste stream shall be limited in 10 CFR 20 Appendix B, Table II, Column 2, Effluent Concentrations, Water.

[6] The discharge of garbage is prohibited.

Prohibited Discharges

ATTACHMENT 4
PLATFORM ELLEN
Prohibited Discharges
April 1, 2015 through June 30, 2015

Prohibited Dishcharge	Permit Requirement/Limit	Monitoring Results
Free Oil [1]	0 days sheen observed on the receiving water during daylight hours	0 Days
Foam [1]	0 days foam observed on the receiving water during daylight hours	0 Days
Floating Solids [1]	0 days solids observed on the receiving water during daylight hours	0 Days
Surfactants [2]	Minimize	Minimized
Detergents [2]	Minimize	Minimized
Dispersants [2]	Minimize	Minimized
Produced Sands [3]	No Disharge	No Discharge
Halogenated Phenol Compounds [4]	No Discharge	No Discharge
Chrome Lignosulfonate [4]	No Discharge	No Discharge
Tracer Materials [5]	Limited	Limited
Garbage [6]	No Discharge	No Discharge

[1] Free Oil, Foam, and Floating Solids: Monitoring by visual observation of the surface of the receiving water in the vicinity of the outfalls shall be conducted during daylight hours.

[2] The discharge of surfactants, dispersants, and detergernts shall be minimized except as necessary to comply with safety requirements of the Occupational Health and Safety Administration and BSEE. The discharge to marine waters in response to oil or other hazardous spills is not authorized.

[3] There shall be no discharge of produced sands.

[4] Other Toxic and Non-conventional Compounds: There shall be no discharge of diesel oil. halogenated phenol compounds, or chrome lignosulfonate. Diesel oil discharge information will be located under the Drilling Inventory attachment when applicable.

[5] Radioactive tracer concentration above the background in the parent, discharge waste stream shall be limited in 10 CFR 20 Appendix B, Table II, Column 2, Effluent Concentrations, Water.

[6] The discharge of garbage is prohibited.

NAME/TITLE PRINCIPAL EXECUTIVE OFFICER			TELEPHONE		DATE
Jim Guion Executive Vice President, Chief Operating Officer	I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.	SIGNATURE OF PRINCIPAL EXECUTIVE OFFICER OR AUTHORIZED AGENT	(562) 628 1526		07 22 2015
TYPED OR PRINTED			AREA Code	NUMBER	MM/DD/YYYY

COMMENTS AND EXPLANATION OF ANY VIOLATIONS (Reference all attachments here)

1. NODI (A): Domestic laundry wastewater is separate and sent to a disposal well. Domestic water from showers and sinks is commingled with sanitary.
2. NODI (A): The sewage treatment unit is a marine sanitation device that complies with pollution control standards and regulations under Section 312 of the Clean Water Act. Thus, it is deemed to be in compliance with permit limitations for sanitary waste chlorine discharges.
