Ken,

Here is a link to the original 5/2/2016 Ameren modeling sent to EPA. This is a password protected .exe file. The password to decrypt the file is zggGso3nnG3Oel9

https://drive.google.com/open?id=0B6_up1FfH9yrTFZjN2lPemVmLTA

Let me know if you have issues extracting the data or retrieving the file.

There must have been an oversight or difficulties in making the exe available in the docket. Can you transmit the modeling files to Maxine or Ken the same way we have before? I think you uploaded them and sent them a link.

I put the May Ameren modeling submittal (I got it on May 2nd) in the docket folder that Jennifer had made for us on sharepoint. It was a password protected executable that included an email with the password. I have no idea if they released that file or included it in the docket. Let me know if I need to get it to them in some other way.

FYI. We'll be coordinating soon, but I would appreciate it if someone might be able to assist with Maxine's specific request below.

Subject: Labadie SO2 Designation

Jonathan,
Late yesterday, I submitted the attached FOIA request to both Region 7 and Headquarters. I have since realized that Ameren's comments dated April 29, 2016 (requested in item #2) are posted at regulations.gov in the Round Two designations docket. However, while Ameren's comments were accompanied by Appendices A-D, the content of Appendix D is not available on regulations.gov. Attached is a copy of Ameren's April 29, 2016 comments as downloaded from regulations.gov. The

last page states that "On behalf of Ameren, AECOM provided EPA with the updated modeling data as a separate submission concurrent with this letter."

I believe that the modeling data submitted by/on behalf of Ameren as Appendix D to the posted comment letter should be publicly available now, and that we should not have to wait until our FOIA request is processed before obtaining that data.

Please let me know how the modeling data in Appendix D will be made available to the public.

Thanks.
Maxine
